

MUHAMMAD ALWI BIN MUHAMMAD SEM YAP

Software Developer

Port Dickson, Negeri Sembilan
018-2935063, muhdalwi3011@gmail.com

SUMMARY

Software Developer with 3 years of experience in **full stack development**, enterprise systems, and AI solutions. Skilled in **Angular, ASP.NET Core, C#, Java Spring Boot, SQL Server, Python**, and **Neo4j Graph Database**. Experienced in developing ERP systems, AI chatbots, fraud detection systems, and document processing solutions. Also involved in Moodle LMS deployment, server maintenance, and system integration. Passionate about learning new technologies and building efficient, scalable applications.

WORK EXPERIENCE

July 2023 – Present

ABOD Technology Services (M) Sdn Bhd (Petaling Jaya, Selangor), Software Developer

- Implemented AI-powered document processing features for the company's internal PEQ system to automate information extraction from uploaded documents using Angular and C# .NET.
- Developed a fraud detection system using Neo4j Graph Database and Angular to identify suspicious relationships and claim patterns through graph-based analysis.
- Deployed and maintained a Moodle LMS platform on Ubuntu server environment with Apache, PHP, MySQL, SSL configuration, automated backups, and security hardening.
- Working for client: **Microlink Solutions Bhd**
 - Worked as a Full Stack Developer under Microlink, contributing to the development of LPPSA systems using Java Spring Boot for backend services and .NET for frontend applications.
- Working for client: **Lonpac Insurance Bhd**
 - Designed and developed an AI-powered chatbot for Lonpac's insurance platform using Python, enabling users to manage policies, renew coverage, and purchase insurance efficiently.
- Working for client: **ITM System Sdn Bhd**
 - Developed and maintained enterprise ERP modules under the ITM project using Angular, ASP.NET Core, SQL Server, and ABP framework, including e-Invoice, audit trail, reporting, and business validation functionalities.

Sep 2022 – Jan 2023

HeiTech Padu Berhad (Putrajaya), Software Developer Intern

- Developed Tourism Licensing & Enforcement System, using ASP.NET MVC framework and .NET C# programming language. A tourism licensing system for Ministry of Tourism, Arts, and Culture (MOTAC).
- Assisted senior developers in completing assigned tasks and modules and resolved system bugs.
- Developed frontend and backend modules using jQuery and Entity Framework (ORM).

PERSONAL PROJECTS

Flower Recognition System (FYP)

- Developed a mobile application to recognize flower names and detect flower toxicity.
- Used the YOLOv4 algorithm for object detection.
- Built using Android Studio and Google Colab for machine learning training.

E-commerce Website Project

- A project developed with team members during UiTM studies.
- The website allows users to browse and purchase PC parts.
- Developed using Java and Eclipse IDE.
